<p>TEE – Town Electrical Engineer or Head of Electrical Department TOU – Time of Use V – Volt</p> <p>DEFINITIONS</p> <p>(Active) Energy Charge – charge per kWh of electrical energy supplied in the month. The Active Energy Charge for TOU tariffs is differentiated into high-demand (June to August) and low-demand (September to May) seasons.</p> <p>Council – Kouga Municipal Council</p> <p>Environmental Levy – a government levy charged on electricity produced by non-renewable generators. It is applied to the total kWh supplied to the customer in the month. This levy is included in the tariffs hereafter.</p> <p>Equivalent Residential Unit – is considered to be a Residential Consumer with a 45 Amps single phase (10,35kVA) supply at 230 Volts nominal.</p> <p>Free Basic Electricity – 50 Free units per month of electricity are given to consumers who qualify for the Electricity Basic Support Services Tariff in terms of Council’s policy. These units are only applicable to the first purchase every month, and are not transferable from one month to another.</p> <p>Municipality – Kouga Municipality</p> <p>Maximum demand - the highest averaged demand measured in kVA during a 30 minute integrating period during all time periods.</p> <p>Network Access Charge – charge payable per month for the highest of either the NMD (minimum 60kVA) or the highest maximum demand reading during the previous 12 months.</p> <p>Network Demand Charge – charge payable per month for the chargeable demand supplied per month. No Network Demand Charge is applicable during Off-peak periods for TOU tariff.</p>		50,00	50,00

<u>Upgrade existing connection</u> <u>A Transformer Fee and/or an Augmentation Levy will be payable in</u> <u>Transformer Fee</u> The Transformer Fee is the pro-rata contribution a Developer or Consumer makes towards sharing the cost of an existing distribution substation of which some of the spare transformer capacity is utilised to make the supply available. The Transformer Fee is a cost per kVA and is based on the additional kVA required by an existing consumer over and above the present supply capacity, or the total kVA required by a new Development less the existing allocated capacity, if applicable. 315kVA miniature substation including an 11kV ring main unit, plinth and earthing. The cost also includes the installation cost and municipal planning and administration charges. It further assumes that the average supply capacity is 80% of the substation's rating. The cost per kVA is therefore equal to the substation cost divided by 80% of 315kVA. The estimated cost of the typical substation and the charge per kVA is determined annually at the	Plus VAT	Cost + 20%	Cost + 20%

Increase Notified Demand	$\frac{[(\text{New Notified Demand in KVA} - \text{Notified Demand in Agreement}) \times \text{Nf}] \div (10,35 \times \text{Df})}{}$			
<p>45 - ERU amps (10,35 kVA)</p> <p>3 - No of Phases</p> <p>0,5 - Average Network Factor for commercial consumers</p> <p>Nf - The symbol "Nf" signifies the Network Factor and is used in the formulae for Commercial and Bulk Supply consumers to take into account that their peak demand may not coincide with the peak demand on the core network. For Commercial consumers this was taken as an average of 0,5. No value is given for the Network Factor (Nf) for Bulk Supply Consumers since this varies substantially depending on the type of load, and since there are fewer Consumers in this category it is not fair to use an average value. The limits will, however, be between 0,5 for say a commercial/industrial type of development with 50% of its peak load coinciding with the core network peak, and 1 (one) for say a domestic development where 100% of its peak load</p>

<u>DOMESTIC CONSUMER TARIFFS</u>			
This tariff covers the supply of electricity for domestic use in private dwellings, flats and chalets with separate meters and includes churches, schools, welfare buildings, hospitals, halls or similar premises with circuit breaker sizes not in excess of 60A single phase or 60A three phase. Should Consumers require supplies in excess hereof, the Commercial Consumer or Bulk Supply tariff will be applicable.

<p>The Bulk Supply tariff is for Consumers with a notified maximum demand of minimum 60kVA or who require a supply greater than a 100Amp three phase circuit breaker size. The Notified Maximum Demand (NMD) is the maximum demand notified in writing by the Consumer and accepted by the Municipality. The Network Demand Charge is payable per month for the demand supplied (maximum demand reading). The Network Access Charge is payable per month based on the highest of either the notified maximum demand (min. 60kVA) or the highest maximum demand reading during the previous rolling 12 month period.</p> <p>Should the Consumer's NMD be exceeded for more than two months, the consumers supply capacity and Augmentation Levy must be reviewed and an Excess Network Access Charge (E-NAC) will become payable. The amount payable through an E-NAC after exceeding for more than two months = (Number of times the NMD is exceeded based on a rolling 12 months) x (the</p>

<u>SEWERAGE</u>	780		
<p>The sewerage charges are calculated on two main components per erf. second portion is based on actual measured water consumption (hydraulic portion) for an erf.</p>			
<u>Fixed Charge</u>			

SERVICE DESCRIPTION	2018/19	2018/19	2017/18
	VAT Inclusive	15% Exclusive	15% Exclusive
	R	R	R

The Fixed Charge provides for costs on the sewerage operating budget such as charges for capital loan and interest payments and provision for a capital reserve fund. This cost is indicative of the installation /construction, rehabilitation and eventual replacement cost of the infrastructure. The cost is fixed for every property which has access to the municipal sewerage system irrespective of the property being vacant (no buildings) or, if the property uses the existing system, including the suction tanker service.

The fixed cost component is therefore payable irrespective of the service being used by the consumer or not, therefore this charge will effectively replace the current "Availability Fee".

The fixed charged per erf is based on the sewage conveyance and treatment cost for an average monthly water consumption per erf which is exceeded by 80% of consumers in the particular category.

Hydraulic Charge

The proposed tariff will also obviate anomalies which exist currently whereby owners of properties in some consumer categories are heavily subsidising users in other categories. With the present tariff in certain instances domestic consumers are also subsidising commercial consumers.

SERVICE DESCRIPTION	2018/19	2018/19	2017/18
	VAT Inclusive	15% Exclusive	15% Exclusive
	R	R	R

The tariff will uniformly apply to all categories of consumers (Sewerage Service) throughout the municipality. Sewage discharge will be calculated on actual metered water consumption that will be reduced by a “discharge factor” i.e, the ratio of kilolitres sewage discharged by each category of consumer, to be determined by the Director: Technical Services. Whilst a standard tariff per kl of sewage will be levied, the discharge factor applicable to the different categories may differ.

The formula used to arrive at the new hydraulic tariff, is as follows:

- P = KVC where,
- P = sewerage charge in Rand
- K = effluent discharge factor
- V = volume(kl) of potable water consumed
- C = prescribed charge in Rand

Rebate of 10% for –

Bulk Consumers/ Private Developments >2Ha, restricting admission, which pay bulk and “on-sell” to patrons within the development and which develop and maintain their own infrastructures.

See table detailing categories and discharge factors below.

The hydraulic portion of the sewerage charge consists of two

Minimum Consumption Charge

SERVICE DESCRIPTION	2018/19	2018/19	2017/18
	VAT Inclusive	15% Exclusive	15% Exclusive
	R	R	R

This is the portion of the sewerage charge to provide for firm operating costs such as salaries, plant and equipment, etc and certain general expenses. The charge is the average cost per erf for a particular category and is based on the firm/fixed cost incurred by the Sewerage Service to operate the sewerage system irrespective of what volume of sewage is conveyed and treated.

The minimum consumption charge is therefore also necessary irrespective of the service being used by the consumer continuously or infrequently.

The first part of the hydraulic charge is calculated on a percentage of the minimum water consumption specified per erf for each category

As from the 2013/2014 Financial Year, this cost has been included in the Fixed Charge Component

Variable Consumption Charge

This is the portion of the sewerage charge to provide for the operating costs that vary depending on the amount/extent of consumption. Electricity consumption, pump maintenance and repairs, etc are typical costs that increase when the sewage flow increases.

SERVICE DESCRIPTION	2018/19	2018/19	2017/18
	VAT Inclusive	15% Exclusive	15% Exclusive
	R	R	R

Nevertheless, during prolonged periods of low flow e.g. during a drought when water restrictions apply, the operating cost can actually increase although less sewage is discharged. Due to low flow the frequency of sewer blockages increases which requires more frequent sewer cleaning with high pressure jetting equipment as a preventative measure.

The second part of the hydraulic portion is calculated on the water consumption in excess of the specified minimum volume up to a specified maximum consumption per erf for domestic categories. No maximum consumption applies to commercial categories.

	R	R	R

(a) The monthly charge payable by the owner or occupier of any trade premises in respect of any trade effluent discharged into the Council's sewers shall be assessed by the Council on a monthly basis and shall be notified to such owner or occupier at the end of each month and shall be charged in accordance with the formula in paragraph (c) below.

The Council shall base its monthly charge on the highest COD of one or more samples collected from the trade effluent samples point.

(b) In case of trade premises from which effluent is discharged into the Council's sewer for the first time a charge shall be payable in respect of the interim period between the date of the first discharge and the last day of the month. Such charge shall be assessed in accordance with the formula prescribed in paragraph(c) below.

(c) The charge payable in terms of paragraph (a) and (b) above shall be assessed according to the formula : $R=Vx[CA + B] + C X S X 10^{-3}$

where :

R = The treatment cost.

V = The volume of industrial effluent discharged from the premises during the cycle concerned in cubic metres

SERVICE DESCRIPTION	2018/19	2018/19	2017/18
	VAT Inclusive	15% Exclusive	15% Exclusive
	R	R	R

A&B = The capital cost (interest and redemption) plus maintenance cost for the cycle concerned on the pipe system as used by the concerned consumer divided by the total flow for the cycle. The value of A being **74.43(excl VAT)** cents per cubic meter. The value of B being **64.32(excl VAT)** cents per cubic meter.

C = The cost of treating one cubic meter of waste water. The value of C being **40.95(excl VAT)** cents per cubic meter.

S = The average chemical oxygen demand in mg/l measured on the industrial effluent during the cycle

(d) In the absence of any direct measurements, the volume quantity of trade effluent discharged into the sewer each month from any trade premises shall be estimated and determined by Council from the monthly quantity of water consumed on the premises concerned, whether obtained from the Council or from other sources, due allowance being made for water used for domestic purposes, water lost by reaction and water present in the final products manufactured.
