The system must be modular that will be able to accommodate future expansion if required.

The quality of the seawater is of the composition given in below. This composition is indicative and the tenderer is expected to verify it by his own sampling and testing.

2. DESALINATION PROCESS**Desalination Method**

The Desalination Method shall be the Sea water Reverse Osmosis.

Sea Intake

Seawater shall be sucked from a suitable location, at a distance from the brine rejection point, so that it will not be affected by the rejected brine, taking into account the prevailing currents in the region. It should also be taken into account, during the sea intake design, the proximity to the treated water outlet of the Local Waste Water Treatment Plant. The Contractor shall construct the seawater pumping station (if required) on the shore adjacent to the area identified suitably in their investigation as approved by the relevant authorities.

Brine and Seawater Discharge

The brine and seawater rejected from the desalination plant units shall be discharged via a suitable pipe back to the sea at a distance approved by the competent authority from the shore and shall be diffused into it, so that the depth of rejection is as approved by competent authority.

The discharge pipe must end in a multipoint diffuser and be raised from the seabed (about 2– 3 meters below the top of the seawater).

Effluents from the desalination plant shall contain no chemicals in proportions which may cause ecological problems in the outfall zones.

Delivery of desalinated water

Desalinated water shall be transferred to the treated water pumping station and then be pumped via the pumping main to the connection point as identified by the client. The pressure of water at that point must be about 12 bar .The pressure may vary from 10 to 15 bar or as determined by the client.

The Contractor shall be fully responsible to carry out the necessary investigations in order to ascertain the state of all the parameters that will affect the production of desalinated water from the plant he will built (water analyses, pollution levels etc.).

In particular the Contractor shall:

i. fence the area earmarked for the facility with a suitable security fence.

Station.

- ii. supply and install all the necessary ground equipment to produce the required quantity and quality of desalinated water,

CERTIFICATE OF INDEPENDENT BID DETERMINATION - COMPULSORY

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
